P·r·o·g·r·a·m

10:00-10:10  Welcome Remark ................................................................. Shin Jung
              Congratulation Address .......................................................... Ji-Ho Kim
              .............................................................................................. Tae-Young Kim

10:10-11:40  Standard Surgical Technique
              Chairpersons: Kyu Sung Lee (Yonsei Univ), Oh-Jyong Kim (Yeungnam Univ)
              • Surgical Technique in Facial Nerve Preservation ........................................ Cheong-In Kim (Ulsan Univ)
              • Surgical Technique in Hearing Preservation .............................................. Shin Jung (Chonnam Univ)
              • Recent Trends in the Management of the Facial Palsy .................................. Rong-Min Baek (Seoul Univ)

11:40-12:30  Special Lecture (II)
              Chairpersons: Sang-Won Lee (Catholic Univ)
              • A Hypothesis of Epiarachnoidal Growth of Vestibular Schwannoma at the Cerebello-Pontine Angle: Surgical Importance ....... Kenji Ohata (Osaka City Univ, Japan)

12:30-13:30  Lunch (Yeo-Mi Food Court)

13:30-14:30  Special Lecture (II)
              Chairpersons: Tae-Young Kim (Wonkwang Univ)
              • Surgery of Meningiomas Involving the Internal Acoustic Canal .................. Alf Giese (Georg August Univ, Göttingen, Germany)
              • Gamma Knife Radiosurgery for Vestibular Schwannoma - Long Term Outcome ....... Jung-II Lee (Sungkyunkwan Univ)

14:30-14:45  Coffee Break

14:45-17:00  Special Issue
              Chairpersons: Kwan Park (Sungkyunkwan Univ), Ha-Young Choi (Chonbuk Univ)
              • Surgical Characteristics of the Vestibular Schwannomas in Patients Diagnosed with Neurofibromatosis Type 2 ..................... Chu-Ki Jung (Koryang Univ)
              • Coexistence of Vestibular Schwannoma and Metastatic Tumor ................. Sin-Soo Jeon (Catholic Univ)
              • A Case of Facial Nerve Injury during Vestibular Schwannoma Surgery: The Moment of Truth ........................................... Eun-Young Kim (Hansa Univ)
              • Overall Results of Microsurgery & Gamma Knife Radiosurgery in CNUHH Series ................................................................. Kyung-Sub Moon (Chonnam Univ)
              • The Surgery of Acoustic Neuroma Failed by Radiosurgery ......................... Yang-Ki (Hanyang Univ)
              • Hydrocephalus following Gamma Knife Radiosurgery in the Vestibular Schwannoma .................................................... Won-Ho Cho (Pusan Univ)

17:00  Closing Remark ......................................................................................... Shin Jung
